

Marxism, Italian Post-Workerism and even Empirical Evidence

By Harry Cleaver, Werner Bonfield, and Matthew Shaperon, even Michael Lebowitz

### I. Reading Capital Politically

Two categories exist – state and capital at many situated levels – which then requires evidence, even phenomenological experience and forms of history we might add which is political history – the state, capital unity then is in turn segmented – Sirohi adds this is labour-living and capital ratios world-wide and nationally (new reference in 2024, written in actually 1980).

Proletariat and bourgeoisie, then are two classes which in turn determines the state and capital unity against them. That many classes actually and sociologically exist then is a scale of classes which we think is proletarian segmentation, composition, and de-composition and even re-composition – we add then of an international working class cycle of class action and even forms of social movements and finally feminism and even situations such as University student fronts.

The proletariat re-composes through trade unions and revolution according to political readings of Marx's Capital.

### II. Computers, Dot.Communist Manifesto and even Software, or Free-Software

The liberals argue we are in the 19<sup>th</sup> century, what about computers, what about television news anchoring, or news shows or even films – what then is the process of the future of Communism.

### III. Finance, Capital and in fact the attack on the working class

I mean as Lebowitz, I am not thinking in mediations of Venezuelan politics – I am against horizontal mass strikes and state policy.

I am also not proceeding to criticise Cuban revolution – which has become a worker's state and failed composition.

### IV. Situations – and Events – When will We Meet – from Che, Fidel and FLN to Mao and Sirohi, the Event with CPSU also and Philosophers training on Sirohian philosophy

In fact the world was without proper phone connectivities, website connectivities and even basic demands on meeting which then happens a lot online and social network on Deterior – it provides a lot of empirical evidence which concretises this work.

I think an aesthetic re-composition is underway while meeting Sirohi – but he must know he is part of Cuba and Algeria and China as well – India is busy re-composing its masses and the party is distant from him, Sirohi – it fuses is true but also merges into a Comintern process which then will be part of the fore-seen actually complexly articulated Event of meeting.
